

Student Health Insurance

All students at UIS must carry health insurance. *Students enrolled in any non-online class will automatically be assessed a student health insurance fee.* Students with equivalent coverage outside of the university's plan may file a Student Health Insurance Petition for Exemption form along with proof of insurance to have the insurance fee removed from his/her account and to prevent future assessments.

The Petition for Exemption and supporting documentation must be filed no later than the posted deadline for the applicable semester. Students who register after the exemption deadline are also automatically assessed the student health insurance fee. These students have five (5) business days to submit exemptions, if applicable.

The Petition for Exemption form only needs to be completed once for continuing students.

Those students enrolled in only courses designated as online, for a given semester, are ineligible to participate in the student health insurance program.
