

# Embedding Atomic Learning Videos Into Blackboard Courses

You can create direct links to Atomic Learning tutorials from your Blackboard course. The URL for the direct link uses a special format. The only item that changes in each tutorial link is the **key number**. Key numbers are listed to the right of the tutorial title.

## Embedding a Video

1. Log-in to Blackboard and click on *Assignments*.
2. Click on *Item*. [Make sure that *Edit View* has been selected]
3. Under **Content Information**, add the following -

- **Name:** Name of the item
- **Text:** "Click here to view the Review of Dreamweaver Interface tutorial."
- Highlight the text and click on the **Hyperlink** button
- A hyperlink dialogue box will open. Insert the tutorial URL in the URL field and click OK.

4. Enter any other details as required under items #2, #3, and #4.
5. Click on **Submit**.

If you have any questions regarding Atomic Learning, please contact:

Kara McElwrath  
ITS Training Specialist

UHB 2026  
Phone: 206 - 8237  
Email: kmcel2@uis.edu

## Example

If the video's key number = 12304,

the URL would be

<http://ezproxy.uis.edu:2048/login?url=http://movies.atomiclearning.com/highed/almovie?key=12304>
