General description of business
SIU School of Medicine is an academic medical institution. Our mission is to assist the people of central and southern Illinois in meeting their health care needs through education, research, patient care and community service.

Internship or Job Description
Research Internship. This internship will provide hands on experience with the planning and execution of experimental procedures in the area of basic and/or translational Alzheimer’s disease research. Interns are expected to be fully engaged in the research and will be given time to read and understand the field of research. Interns may be involved with handling and administering behavioral tests on rodents, administering therapeutic agents, performing protein and RNA analysis of tissues, etc. Attention to detail and strong computer skills are required.

Basic student learning anticipated
Interns will be provided broad experiences in biomedical research and laboratory functioning. They will work closely with experienced principle investigators and their laboratory teams to explore/extend current research projects. Level of independence will be contingent on satisfactory progress, adherence to laboratory rules/regulations, attitude, and effort shown in the project.

Hours per week: Up to 25

Number of weeks: 8- 16

Position Available: Fall, Spring, Summer

Unpaid Updated: 11/20/17

*If offering an unpaid internship you will have to review and agree to follow the Fair Labor Standards Act guidelines.
