General Description of agency or business
The Partnership for a Connected Illinois is an Illinois-based non-profit organization charged with leading a vigorous broadband initiative on behalf of the State of Illinois in partnership with the private sector, educational institutions, local governments and community groups.

Internship or Job Description
We are looking for someone with a good knowledge of web and database development. The ideal candidate should display attention to detail, be a self-starter, show creativity in solving problems, and shall demonstrate a basic understanding of website design, programming, and database administration. This position requires the ability to work well in a team setting, while being detail-oriented and self-motivated. The ideal candidate should also have knowledge of CMS systems and be competent in all of the following topics:

- HTML
- CSS
- JQuery
- Photo Shop
- PHP/MySQL

Additional Desired Qualifications:

- Database programming skills
- GIS Systems skills
- Building database forms
- Writing database scripts for analysis
- GIS Data Management
- Development of web-enabled relational databases
- Knowledge of Salesforce

Basic student learning anticipated
Working for our organization will give a student broad experience in CMS website design as well as website project management. The student should gain experience in working in a non-profit and team environment. The student’s proficiency with GIS data and mapping should become extended. The daily use of Salesforce should strengthen the student’s exposure to relational databases.

Hours per week: Up to 20
