Description
Install and configure Windows Deployment server: build several images and image new machines to be deployed to internal employees with the help of IT staff.
Install and configure network printers for internal use.
Assist in the maintenance of the internal organizational security and network infrastructure.

Apply by sending your resume to dtrencevski@rolandmachinery.com

Position Type
Internship - Undergraduate Academic Credit, Internship - Graduate Academic Credit, Internship - Undergraduate Level: Not for Academic Credit, Internship - Graduate Level: Not for Academic Credit

Qualifications
Communication is essential for the position. Ability to communicate and bond with department and organizational employees is immense (300 employees at 15 different branches). Technical skills are a secondary concern and our staff will be able to train the student.

Additional Information
Intern will gain experience in working in a professional IT environment with experienced IT professionals such as Network Admins, Web Developers and Database Admins. In addition,
she/he will learn how to configure servers in a network environment and how to mass deploy laptops and desktops. Also, the intern will get familiar with the development and maintenance process of internal networks as well as maintenance and security in business organizations.
