DAY 2 AFTERNOON:
DUI ASSESSMENT TOOLS
2017-2018 IDHS DUI ORIENTATION
ASSESSMENT TOOLS

My Training Room Rules

1. Only One Person Speaking At A Time
2. Be Respectful and Professional
3. No Sidebars
4. Stay On Point
5. Enjoy Academic Freedom
6. Have some fun 😊

Assessment Tools

- Driver’s Risk Inventory (DRI-2)
- Mortimer-Filkins
- Adult Substance Use & Driving Survey - Revised Illinois (ASUDS-RI)

- Who uses the DRI?
- Who uses the M/F?
- Who uses the ASUDS?
- Who’s thinking about changing tools?
Driver’s Risk Inventory
DRI-2

BEHAVIOR DATA SYSTEMS
BDS@BDSLTD.COM
1.800.231.2401

DRI-2 Features

Normed on all (BDS-recorded) DUI offenders
BDS reviews data collected on an annual basis and updates test as needed (+ yearly summary)
Includes gender specific norms
Identifies attempts to fake or under report problems/concerns
Measures substance use involvement and risk to public safety
It is a valid instrument

Administering the DRI-2

113 Questions - 3 sections
Section 1: true/false
Section 2: multiple choice
Section 3: self-rating 1-4
Computer
On-line testing or flash drives
Paper and pencil
Interview
IMPORTANT: A few minutes of oral instructions can put the client at ease while providing structure and clarifying expectations.
Six Empirically-Based Measures (Scales)

1. Truthfulness Scale
2. Alcohol Scale
3. Drug Scale
4. Driver Risk Scale
5. Stress Management Scale
6. Substance Use Disorder Scale (DSM-5)

* Illinois Mandatory Minimums *

DRI-2 Scales

Truthfulness Scale—measures how truthful the client was and identifies self-protective, recalcitrant and guarded people who minimize or even conceal information.

Alcohol Scale—measures client's alcohol use and proneness to alcohol-related problems.

Drug Scale—measures client's drug use and proneness to drug-related problems.

DRI-2 Scales (cont’d)

Driver Risk Scale—measures the client's driving risk, independent from their involvement with alcohol/drugs. Helps identify the irresponsible/aggressive driver.

Stress Management Scale—measures the client's ability to handle or cope with stress. Severely impaired coping abilities are indicative of other identifiable emotional/mental health problems.
Risk Ranges

<table>
<thead>
<tr>
<th>Percentile Rank</th>
<th>Risk Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 to 39th percentile</td>
<td>Low Risk</td>
</tr>
<tr>
<td>40th to 69th percentile</td>
<td>Medium Risk</td>
</tr>
<tr>
<td>70th to 89th percentile</td>
<td>Problem Risk</td>
</tr>
<tr>
<td>90th to 100th percentile</td>
<td>Severe Risk</td>
</tr>
</tbody>
</table>

> These Risk ranges are calculated individually for five of the six.
> The Substance Use Disorder Scale is not scored as the others.

Substance Use Disorder Scale

Substance Use Disorder Scale—a separate scale from the other five, and based on how many of the 11 DSM-5 criteria are endorsed.

- None or one = DNM or “Low”
- Two or three = “Moderate”
- Four or five = “Problem”
- Six or more = “Severe”

** DRI Risk Ranges vs. DASA Risk vs. DSM-5 severity scale **

Significant Items:

Significant items are self-report responses that represent areas that may help in understanding the respondent’s situation and status.

- Alcohol
- Drug
- Substance Use Disorder
- Driver Risk

* Additional Items: ........
Special Scores

When the Truthfulness Scale is at or above the 95th percentile, all other scale scores (alcohol, drug, driver risk, and stress/coping) automatically go to the 99th percentile. This is to alert the evaluator to a very high Truthfulness Scale score, which means the test results are inaccurate.

What should you do?

Retest

If client’s invalidate their DRI-2, it is recommended that they be given the opportunity to be retested.

Review oral instructions before testing.

Illinois Mandatory Minimums

DRI-2 Update as of January 2017...
Driver’s Risk Inventory

QUESTIONS?

Mortimer-Filkins Assessment Tool

RUDOLF G. MORTIMER, PHD.
LYLE FILKINS (1973)

Initially devised to identify problem drinkers from among DUI offenders
Initially validated against a general population
Demonstrates high degrees reliability & validity
Shown to be predictive of DUI recidivism

Information from the British Journal of Addiction, Vol. 85, Issue #11, November 1990
Mortimer-Filkins

Two parts: Interview and Test
- Test validity/reliability are dependent on completion of both parts!

Pencil/paper only
- 58 Questions on Test
- 188 Questions in Interview

Hand scored (using 3 scoring keys)

Mortimer-Filkins

Yes, it’s an acceptable tool per DHS/DASA. But:

1) Only assesses Alcohol
2) Only validated on males, ages 35-45
3) Has not been updated since 1973

Mortimer-Filkins

QUESTIONS?

THE ADULT SUBSTANCE USE AND DRIVING SURVEY
REVISED (ILLINOIS) ASUDS-RI
Assessment of the Impaired Driving Offender

DEVELOPED BY DR. KENNETH WANBERG AND DR. DAVID TIMKEN, OF THE CENTER FOR ADDICTION RESEARCH AND EVALUATION
OVERALL GOALS OF TRAINING

To provide an introduction in the use of the ASUDS-RI in Differential Screening and assessment of impaired driving offenders within the framework of the Convergent Validation Model.

Definitions

- **Differential Screening:**
  Multidimensional (AOD) screening that measures the extent to which individuals are involved in various kinds of drugs and the extent of negative consequences or symptoms resulting from this involvement.

Definitions (continued)

- **Convergent Validation Model:**
  Uses self-report and other-reports as valid representations of where the client is at the time of assessment.
What are the Objectives of Screening and Assessment?

1. To provide an opportunity for clients to disclose their AOD use history, or "tell their story";
2. To give an opportunity to other sources to tell the story of how they interpret the client’s AOD history;
3. To determine the level of defensiveness based on the discrepancy between the self report and other reports
4. Estimate the true or valid condition of the client relative to past and recent AOD use, level of mental health problems, and motivation for change and treatment

Sources of Data

To achieve the above stated goals, the evaluator has two sources of data:

1) Self-report
2) Other-report data – law enforcement, probation officer, family members, laboratory results, etc.

* Both kinds of data are subjective
Other-report Data is:

Double-subjective, meaning...

But, this can be controlled if there is an established criteria for decision making which improves the evaluators’ reliability.

Self-report Data is Essential

It is a valid representation of client at assessment.
Assesses the client’s willingness to self-disclose.
View distortions as perceptual defensiveness.
A change in that view or increase in self-disclosure can mean treatment is working.

---reality is as client perceives it. We approach the world through the process of interpretation. We construct our own realities and form views of ourselves.
Self-report data can be made more objective if:

- Collected in a standardized format
- Uses multiple variable measures to cancel out errors.
- The evaluator establishes rapport with client – i.e. motivational interviewing

From The Convergent Validation Perspective

- Self-report is the baseline measure of the client’s willingness to self-disclose at the time of assessment
- Self-report should not be reported as invalid, but rather indicative of the discrepancy between sources of data
- Reframe the view of lying, minimizing or denial as perceptual defensiveness.
- Getting valid and reliable data depends on building trust and rapport with the client, being up-front as to how the data will be used, and communicating a positive regard for the client’s self-disclosure

Group Activity
Guidelines For Using Self-report Psychometric Tests

Methods of test administration should be standardized

Reading level of client should be checked

Screening instrument should not be used for comprehensive assessment – It is not ASAM. It is not a SUD diagnosis.

Guidelines (Continued)

When using computerized scoring, evaluator should have knowledge of the test itself and not just rely on the computerized interpretation

Clients should receive feedback from their assessment results compared to the normative group.

Make test instructions clear and include the following:

✓ Answer each question as honestly as possible as to how you see yourself
✓ Give only one answer to each question unless otherwise specified
✓ Results will be treated as confidential
✓ Results will be used to develop services most appropriate for you
✓ Results will be shared with you
ASUDS-RI General Overview and Description

Self-Report, differential screening instrument for impaired driving offenders ages 16 and older

Self-administered or interview administered

General Overview And Description

Comprised of 113 self-report items
- 13 Basic scales, and six (6) Supplemental scales

Basic Scales #1-11 are normed on impaired IL driving offenders.
Basic Scales #12-13 are normed on a clinical sample of AOD clients in IOP or Residential treatment.
Supplemental Scales A,B,C are normed on the clinical sample.
Supplemental Scales D,E,F are normed on the Illinois DUI offender.

NORMED ON DUI GROUP (N=984) * INPT/IOP NORMS (N=669) PERCENTILE
1. Alcohol Involvement (Items 1-13)

- Measures the extent of involvement in alcohol use.
- Measures low level of alcohol use patterns and problems, and many can be endorsed by the average drinker with no alcohol use problems.
- Is a reliable and valid measure of involvement in alcohol use, and, to some extent, abuse.

Teddy’s score is 25

2. Driving Risk (Items 14-25)

- General everyday driving situations...
- Most DUI clients are reluctant to endorse these items because of perceived threat to loss of license.
- Their scores increase on retesting when their responses are perceived to no longer be a threat to loss of license.
- Those with a raw score of 10 or higher are being open about their driving habits and attitudes, but also represent a risk.

Teddy’s score is 9

3. Involvement-1 (Items 26-35)

- Provides a measure of lifetime involvement in the 10 major drug categories.
- 3 parts to each question 26-35.
- Many multiple drug users may have not used some of the drugs recently, thus age of last use is an important variable.

Teddy’s score is 9
4. AOD Use Benefits (Items 1-3, 8, 13, 37-44)

- Measures the degree to which client reports using alcohol or other drugs for social and psychological benefits
- Good indication whether client is using alcohol or other drugs to manage depression, anxiety, feel good, be more sociable
- 40-50% report not using for these purposes, and about 20% report significant AOD use for psychosocial benefits.

Teddy’s score is 17

5. Disruption-1 (Items 45-64)

- Broad measure of problems and negative consequences due to AOD use
- Focus is on disruptive signs and symptoms in relationship to drug use in general, not to any specific drug or drug category.
- High scores indicate AOD related loss of behavioral control, disruption of psychosocial functions, and disruption of social role responsibilities.

Teddy’s score is 34

6. AOD Involvement—Last 12 Months (Items 26-35, 45-64)

- Same as Scale 3 (lifetime), but...
- Broad measure of problems and negative consequences due to AOD use in 12 months prior to last DUI arrest
- Focus is on disruptive signs and symptoms in relationship to drug use in general in those 12 months BEFORE arrest...
- Because AFTER arrest, many clients go into a shape-up mode: significantly reduce or stop use.

Teddy’s score is 22
7. Mood Adjustment (Items 65-73)

- A single dimension of psychological and emotional disruption
- High scores indicate depression, worry, anxiety, irritability, anger, feelings of not wanting to live, unable to control emotions
- About 20 percent DUI clients will score in range that indicates need for further evaluation for mood/psych problems

Teddy's score is 10
Would Teddy benefit from a psychological evaluation?

8. Social-Legal Non-conforming (Items 81-106)

- This is a broad measure of rebellious, antisocial behavior & attitudes, and involvement in anti-legal or criminal conduct.
- Has both static and dynamic items. The dynamic items measuring aggressive behavior and rebellious attitudes, and association with antisocial peers. Static items measure involvement in criminal conduct (youth &/or adult)
- Moderate to high scores indicate anti-social patterns and character pathology, but also indicates openness to self-disclosure and low defensiveness.
- Item 84 ("..has been charged with DUI") is good check for overall ASUDS-RI response veracity

Teddy's score is 14
Deeper look into his criminal history?

9. Global AOD - Psychosocial (Sum Scales 3, 5, 7, 8)

- Comprised of the sum of the four scales: AOD Involvement1, Disruption1, Mood Adjustment, and Social-Legal Non-Conformity.
- Provides a global and overall measure of the degree to which client is indicating life-functioning problems in the areas of substance use, mood adjustment and community compliance.
- This is the scale that represents the suggested risk classification.

Teddy's score is 67
10. Defensive (Items 9, 74 – 80, 84)

- Measures degree to which client is able to self-disclose.
- Comprised of statements to which almost all individuals can give a yes answer, even though it may be at a "hardly at all" level of response.
- It is a measure of social desirability.

Teddy’s score is 15

11. Motivation (Items 107-113)

- Reliable measure of degree to which client is motivated to seek help, to make changes, and to stop or to continue not to use alcohol or other drugs.
- Low score on Motivation, Defensiveness, and Disruption could indicate client’s AOD and other problems are truly in low range and that high level of treatment services not needed.

Teddy’s score is 13

How does this score reflect his motivation?

12. Involvement-2
13. Disruption-2

- Scale 12 = Scale 3, except...
- Scale 13 = Scale 5, except...

- Allows comparison of client with own peers and vs. clinical sample

Teddy’s scores are 9 Involvement and 34 Disruption
A. Behavioral Control Disruption (Items 45-50)

- Important to remember that this scale was normed on the clinical sample.
- Measures behavioral control loss and disruptions while under influence of drugs.
- High scores (decile ranges 8-10) may indicate client is at risk of harm to self or others when using, and can get out of control.

Teddy’s score is 11
Do you want to explore loss of control behaviors?

B. Psychophysical Disruption (Items 51-60)

- Also normed on the clinical sample.
- Measures degree to which client has experienced psychophysical symptoms associated with AOD intoxication or withdrawal.
- Can be life threatening, and high scores indicate past AOD disorders.

Teddy’s score is 16.
Table 2  
ASUDS-RI Scoring Procedures for Supplemental Scales

<table>
<thead>
<tr>
<th>ASUDS SCALE</th>
<th>ITEMS IN EACH SCALE</th>
<th>SCORING WEIGHTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>A. BEHAVIORAL DISRUPTION*</td>
<td>45-50</td>
<td>$a = 0, b = 1, c = 2, d = 3, e = 4$</td>
</tr>
<tr>
<td>B. PSYCHPHYS DISRUPTION*</td>
<td>51-60</td>
<td>$a = 0, b = 1, c = 2, d = 3, e = 4$</td>
</tr>
<tr>
<td>C. SOCIAL ROLE DISRUPTION*</td>
<td>61-64</td>
<td>$a = 0, b = 1, c = 2, d = 3, e = 4$</td>
</tr>
<tr>
<td>D. SOCIAL NON-CONFORM</td>
<td>81-92</td>
<td>$a = 0, b = 1, c = 2, d = 3$</td>
</tr>
<tr>
<td>E. LEGAL NON-CONFORM</td>
<td>93-106</td>
<td>$a = 0, b = 1, c = 2, d = 3, e = 4$</td>
</tr>
<tr>
<td>F. SOCIAL-LEGAL 12 MONTHS</td>
<td>89-106</td>
<td>$a = 0, b = 1, c = 2, d = 3, e = 4$</td>
</tr>
</tbody>
</table>

* These scales are normed on a clinical sample of AOD clients in an intensive outpatient program or in an AOD residential treatment program.
C. Social Role Disruption (Items 61-64)

- Final scale in this group normed on the clinical sample.
- Indicates degree to which the individual's AOD use has disrupted normal and expected social roles, e.g. job, obeying law, family responsibilities
- High scores can be associated with depression and discouragement
- High scores suggest need for life-management skills and training in areas of employment and family skills

Teddy's score is 7 which falls in the low-medium range, but he is only 20 years old.

D. Social Non-conforming (Items 81-92)

- Within the Community: Measure of past and current rebelliousness and even antisocial behavior and attitudes
- Those with moderate to high scores are open to self-disclosure
- However, individuals with significant antisocial features and character pathology are often resistant to treatment.

Teddy's score is 8

E. Legal Non-conforming (Items 93-106)

- Most of these items are static variables.
- Measures degree of involvement in the adult criminal justice system: Hx of arrests, convictions, time on probation/parole, and time spent in jail or prison.
- Most DUI clients will score zero or very low. About 70% will have a low raw score on this scale (4 or less).
- 10th decile range scores on both scales D and E indicate significant problems and history of both antisocial and anti-legal problems and may suggest a lifestyle pattern of social-legal non-conformity

Teddy's score is 6
F. Social-Legal Non-Conforming 12 Months (Items 89-106, last 12 Months)

- Measures recent legal problems.
- Over 70% of IL sample of DUI offenders will have a very low raw score (4 or less). Raw scores above 5 suggest client has had noteworthy if not significant involvement in social-legal non-conformity in the 12 months prior to their evaluation.
- Only 10 percent of Illinois DUI sample had a raw score of 8 or more.
- Some clients are willing to report recent involvement in the judicial system, but most DUI clients are quite guarded.

Teddy’s score is 4.

ASUDS USER’S GUIDE

THE ASUDS-RI DISK INCLUDES A COPY OF THE USER’S GUIDE. PLEASE REFER TO THIS GUIDE FOR ADDITIONAL INFORMATION.

Something to remember....

Offender assessment is client-centered and society-centered. The safety and welfare of the client, others and the community are the number one priorities when determining risk.

Although the ASUDS-Ri provides useful guidelines for service placement, final service and treatment referral decisions are never made solely on the results of a self-report instrument. All sources of data are used in making these decisions.

DAY 2 AFTERNOON: HANDOUTS

DUI ASSESSMENTS
IL DRI-2

Instructions
We realize this is a difficult time for you. Nevertheless, we need more information so we can better understand your situation.

All questions in this questionnaire should be answered. Do not skip any questions. Your cooperation is appreciated.

The term “substance use” refers to alcohol and drugs.

Anticipate approximately 20 ± minutes to complete this questionnaire.

You may begin.

Section 1
The statements in this section are to be answered true or false. If a statement is true, put an X under T for True on your answer sheet. If a statement is false, put an X under F for False on your answer sheet.

1. There have been times when I have been irritated and frustrated by other drivers.
2. I am concerned about my drinking.
3. I am an impatient person and usually drive fast.
4. I have used drugs more than I should.
5. There are times when I get very angry.
6. My drinking has caused serious family and social problems for me.
7. I am quick tempered and need to learn how to control it.
8. There have been times when I have felt guilty about my use of drugs.
9. I often drink more or use more drugs than I intended.
10. There are times when I really worry about myself and my happiness.
11. There are times when I feel guilty about my drinking.
12. I can be easily annoyed or angered while driving.
13. I am concerned about my drug use.
14. I have used my cell phone while driving.
15. My drinking is more than just a little or minor problem.
16. When I get frustrated and annoyed at another driver I tend to “fly off the handle” and curse or swear at them.
17. A family member has told me I should get help for my drug use.
18. I spend a lot of time using alcohol and/or drugs and recovering from their effects.
19. There have been times when I have driven after drinking.
20. I attend Alcoholics Anonymous (AA) meetings because of my drinking.
21. Even though I wasn’t caught, I have made mistakes while driving that were my fault.
22. I have been treated for a drug problem.
23. I know I shouldn’t, but there have been times when I have been jealous of others’ success.
24. Once I begin drinking, it often seems as if I cannot stop.
25. I get angry quickly.
26. My repeated substance (alcohol/drug) use has resulted in my failing to fulfill important duties and responsibilities at home, school or work.
27. I get upset when others criticize or blame me.
28. I have had two or more memory losses (blackouts) after drinking heavily.
29. There are times when I get really frustrated and angry.
30. I admit I am often an aggressive driver.
31. I have had a drug abuse problem in the past.
32. I don’t consider myself a fast or aggressive driver, but at some point I do exceed the speed limit almost every time I drive.
33. I continue to drink despite family arguments about my drinking.
34. I regret some of the things I have said or done when I was angry or mad.
35. To be honest, I am a fast and aggressive driver.
36. There are times when I am concerned that others may think badly of me.
37. I go to Narcotics Anonymous (NA) or Cocaine Anonymous (CA) meetings because of my drug use.
38. I do not always tell the whole truth when asked about my personal life.
39. I continue my substance (alcohol/drugs) use despite the recurrent social and interpersonal problems this causes.
40. There are times when I am really down, depressed and discouraged.
41. I am a recovering alcoholic.
42. When I am angry or mad I become verbally abusive and shout or swear a lot.
43. It bothers me when I am overlooked or ignored by people I know.
44. I have given up or reduced important social, occupational or recreational activities because of my substance (alcohol/drug) use or abuse.
45. There are times when I am very unhappy.
46. I have admitted to a family member that I have a drinking problem.
47. Two or more of the following apply to me (answer true or false on your answer sheet):
   a. I have driven without proper insurance.
   b. My driver’s license has been suspended or revoked.
   c. I use my cell phone while driving.
   d. I have had three or more speeding tickets in the last ten years.
   e. I have caused two or more at-fault accidents.
48. My use of drugs has threatened my happiness and success in life.
49. Even though I am aware of the harmful effects of repeated substance use, I continue to drink and/or use non-prescription drugs.
50. Sometimes I get angry and upset at myself.
51. I have had to use much more alcohol and/or drugs to get the same effect I used to.
52. I have missed school or work because of my drinking.
53. I have lied about my use of drugs — either saying I use less than I really do, or hiding the fact that I use drugs at all.
54. I am a careless, inattentive or indifferent driver.
55. People tell me I lose control over little problems and minor frustrations.
56. I have been treated for a drinking problem.
57. I have admitted to a close family member that I have a drug problem.
58. I often take substances (alcohol/drugs) in larger amounts or over a longer period than I intended.
59. I use and sometimes abuse drugs.
60. I send and receive text messages while driving.
61. I have done things when angry or mad that I later regretted.
62. I am in counseling or treatment for my drinking problem.
63. To be honest, I drive too fast.
64. I continue to use drugs despite family arguments about my drug use.
65. Almost all of my normal daily activities are associated with (or affected by) my substance use and abuse.
66. Drinking has interfered with my happiness and success in life.
67. I have a drug problem.

68. There are times when I really worry about myself and my future.

69. Within the last year I have had persistent cravings and strong urges for my alcohol and/or drug use.

70. Because of my drug use I have given up or quit social functions, work and/or recreational activities.

71. I continue using substances (alcohol/drugs) even though I know they cause physical and psychological problems for me.

72. I have a drinking problem.

73. There have been times when I knew I should not drive – but did.

74. Rate your “driving” on a ten point scale. One represents a “poor” driver-rating whereas ten represents a “good” driver-rating. I rate myself as:
   1. A poor (rate 1 or 2) driver.
   2. An adequate (rate 3, 4 or 5) driver.
   3. A below average (rate 6, 7 or 8) driver.
   4. A good (rate 9 or 10) driver.

75. My drinking is:
   1. A serious problem.
   3. A mild problem.

76. My drug use is:
   1. A serious problem.
   3. A mild problem.

77. I have tried but I cannot:
   1. Reduce, cut down or control my use of alcohol and/or drugs.
   2. Stop using alcohol and/or drugs.
   3. Both 1 and 2.
   4. None of the above.

78. Rate your drinking on a ten point scale. One represents “no problem,” whereas ten represents a “severe drinking problem.” I rate my drinking as:
   1. No problem (rate 1 or 2).
   2. Mild alcohol use (rate 3, 4 or 5).
   3. A drinking problem (rate 6, 7 or 8).
   4. A severe drinking problem (rate 9 or 10).

79. Rate your drug use on a ten point scale. One represents “no drug use problem,” whereas ten represents a “severe drug abuse” problem. I rate my drug use as:
   1. No drug use problem (rate 1 or 2).
   2. Mild drug use problem (rate 3, 4 or 5).
   3. A drug abuse problem (rate 6, 7 or 8).
   4. A severe drug abuse problem (rate 9 or 10).

80. Within the last year I have had intense urges or cravings for my substance of choice:
   1. In settings where I had used the substance.
   2. Randomly, at different times and places.
   3. Both 1 and 2.
   4. None of the above.

81. How would you describe your desire to get alcohol treatment or help?
   1. I want help.
   2. I may need help.
   3. Maybe, not sure.
   4. No need.

82. My repeated substance (alcohol/drug) use has resulted in:
   1. Absences or poor performance in school or work due to alcohol and/or drug use.
   2. Neglecting my household duties or responsibilities.
   3. Both 1 and 2.
   4. None of the above.

83. I have continued alcohol and/or drug use despite persistent and recurrent:
   1. Social and/or interpersonal problems
   2. Arguments or fights with my family or significant other about my substance use.
   3. Both 1 and 2.
   4. None of the above.
Section 3
Rate each statement as it applies to you now. Put an X on your answer sheet under the number that you select for your answer. Use the following rating scale.

1. Rare or Never  3. Often
2. Sometimes  4. Very Often or Always

90. Positive Attitude / Outlook
91. Anxious / Worried / Fearful
92. Satisfied with Self / Like Self
93. Nervous / Unable to Relax
94. Impulsive / Spontaneous
95. Financially Stable / Responsible
96. Dissatisfied with Life
97. Able to Handle Life's Problems
98. Insomnia / Trouble Sleeping
99. Careful / Considerate Driver
100. Enthusiastic / Involved in Life
101. Fatigued / Tired / Sluggish
102. Angry / Hostile with Others
103. Work / Job Satisfaction
104. Tension / Stress / Pressure
105. Trust My Own Judgment
106. Depressed / Discouraged
107. Rebellious / Unruly / Defiant
108. Content with Life / Satisfied
109. Lonely / Unhappy
110. Careless / Inconsiderate Driver
111. Patient / Tolerant / Understanding
112. Emotionally Upset / Crying
113. Express My Feelings Comfortably

When finished turn in your questionnaire and answer sheet.

Thank you for your cooperation.

## Answer Sheet

**Accurately Complete the Following Information**

<table>
<thead>
<tr>
<th>Name: _________________________</th>
<th>First Name</th>
<th>Middle Initial</th>
<th>Last Name</th>
</tr>
</thead>
</table>

**Age:** ______

**Date of Birth:** ___ / ___ / ___

Month Day Year

**Sex:** M ☐, F ☐

**Education (Highest Grade Completed):**

**Ethnicity (Race):**

**Marital Status:** Single, Married, Divorced, Separated, Widowed

<table>
<thead>
<tr>
<th>Last Four Digits of Your SSN:</th>
<th>______</th>
<th>______</th>
<th>Today's Date: ___ / ___ / ___</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>______</td>
<td>______</td>
<td>Month Day Year</td>
</tr>
</tbody>
</table>

**INSTRUCTIONS:** If the answer is none, put in a zero. If the item does not apply to you put in an “N”. If the BAC is refused enter “R”. If there is no BAC enter “N”. Otherwise enter an attained three digit BAC level number.

1. **Date of your present DUI/DWI:** ___ / ___ / ___

2. **Do you have other or additional DUI/DWI offenses pending?** Y ☐ N ☐

3. **Primary / underlying reason for your present DUI/DWI (select one):**
   - Alcohol ☐
   - Marijuana (pot) ☐
   - Drugs ☐
   - Substance abuse ☐
   - Zero Tolerance ☐
   - Impaired due to other substances ☐

4. **Blood Alcohol Content (BAC) level at time of DWI arrest:** ___

5. **Did you refuse a breath/blood test?** Y ☐ N ☐

6. **Number of DUl/DWI arrests in your lifetime (include current arrest):**

7. **Is your driver’s license suspended or revoked?** Y ☐ N ☐

8. **Was your current arrest reduced to careless or reckless driving?** Y ☐ N ☐

9. **Number of alcohol-related (not DUI/DWI) arrests in your lifetime:**

10. **Number of drug-related (not DUI/DWI) arrests in your lifetime:**

11. **Number of at-fault motor vehicle accidents in your lifetime:**

12. **Total number of traffic violations (tickets) in your lifetime:**

Thank you for your cooperation.
Illinois Driver Risk Inventory-2

Name: [Redacted]
Age: 25
Sex: Male
Date Of Birth: 08/26/2017
Race: Caucasian
Marital Status: Single

CONFIDENTIAL REPORT
Last 4 Digits of SSN: 0000
Education: Tech./Business School
DRI-2 Date: 6/23/2017

Driver Risk Inventory-2 (DRI-2) results are confidential and should be considered working hypotheses. No decision should be based solely upon DRI-2 results. The DRI-2 is to be used in conjunction with experienced staff judgment.

Mandatory Minimum DUI Risk

High (Severe Problem) Risk
Mr. Illinois Mandatory Minimum DUI Risk Classification is in the High (Severe Problem) Risk range. High risk is characterized by the following: four or more DSM-5 Substance Use Disorder symptoms (regardless of his driving record), and/or within the last ten years any combination of two or more prior DUI convictions, court ordered DUI supervisions, prior statutory summary suspensions, or prior reckless driving convictions reduced from DUI (resulting from separate incidents). In summary, Mr. Illinois Mandatory Minimum DUI risk range is in the High (Severe Problem) Risk range.

Different Measures
Illinois’ Mandatory Minimum DUI Risk Classification uses court-related data and DSM-5 Substance Use Disorder criteria to classify DUI risk. While the Substance Use Disorder scale consists of admissions to eleven DSM-5 questions, the Alcohol and Drug Scales focus on client opinions regarding their drinking and drug use. That said, different measures may produce different results. Illinois mandatory minimums take precedence.

<td></td>
<td></td>
</tr>
</tbody>
</table>
Mr. Truthfulness Scale score is in the low risk (zero to 39th percentile) range. Low risk scorers are generally sincere, candid and plain spoken. Client (DUI offender) truthfulness has been linked to positive counseling and treatment outcomes (Simpson, 2004). In contrast, denial (problem minimization or refutation) has been linked to negative treatment outcomes (Marshall, et al, 2001). References or citations are available on www.driver-risk-inventory.com and DRI-2 truthfulness research is presented on www.bds-research.com. Assessors can rely upon Mr. answers to Driver Risk Inventory-2 (DRI-2) questions because he was honest and truthful while completing the DRI-2.

**Scale Score Paragraphs**

All seven Illinois DRI-2 scale-related paragraphs explain when problems exist and what each attained scale score means. It should be understood that the Illinois Mandatory Minimum DUI risk range has priority and takes precedence. Nevertheless, when problems exist, risk-related recommendations are offered.

**Substance Use Disorder: SEVERE**

The DSM-5 postulates eleven substance use severity criterion. Substance use severity is then determined by the number of the eleven substance use severity criteria that are admitted to. Mr. admits to six or more of the eleven severity criteria, which meets the DSM-5 severe substance use classification. Admitting to six or more of the eleven criteria is the highest or most severe classification. This DSM-5 codification is equivalent to a Driver Risk Inventory-2 (DRI-2) severe problem (90 to 100th percentile) classification. By DSM-5 substance use severity standards Mr. has a severe substance abuse problem. Severe problems require intensive outpatient or inpatient treatment.

**Alcohol Scale: SEVERE**

Mr. has a severe drinking problem. Alcohol Scale score is in the severe problem (90 to 100th percentile) range. Recommendations: consideration should be given to either "intensive outpatient treatment" or "partial hospitalization." This level of care allows patients to live in their home (real world) while receiving treatment. In other words, patients can sustain relationships, employment and maintain their income. Should Mr. relapse his optimum level of care would likely increase to "residential/inpatient" treatment. Self-help or mutual-help group meetings would likely augment, but should not replace treatment.

**Drug Scale: SEVERE**

Drug Scale score is in the severe problem (90 to 100th percentile) range. Consideration might be given to either "intensive outpatient treatment" or "partial hospitalization." These levels of care allow patients to continue to live at home and keep their jobs while receiving chemical dependency treatment. This helps patients sustain relationships and employment while in treatment. Self-help meetings are generally available on-site to augment, not replace, treatment. An interdisciplinary treatment team would be advantageous when treating co-occurring disorders and "imminent danger" cases. Should Mr. relapse his optimum level of care would likely increase.

**Driver Risk: MODERATE**

Driver Risk Scale score is in the moderate risk (40 to 69th percentile) range. Some indicators of inattentive driving are present, but an established pattern of irresponsible driving is not present. Mr. may only be a driving risk after using alcohol (beer, wine or liquor) or drugs (prescription and/or nonprescription). Prudent assessors will check out the other Driver Risk Inventory-2 (DRI-2) scales that can directly contribute to Mr. driving risk, e.g., Truthfulness Scale, Alcohol Scale, Drug Scale, Substance Use Scale and the Stress Management Scale. Any elevated (70th percentile and higher) scale scores would contribute to driver risk. On its own merits Mr. Driver Risk Scale indicates he is a safe driver.
Stress Management Scale: MODERATE

Mr. Stress Management Scale score is in the moderate (40 to 69th percentile) range. Stress management issues are becoming apparent. If left unattended these potential issues or concerns could worsen. Recommendations: a "brief intervention" might be considered. Brief interventions range from 15 to 30 minutes of direct face-to-face staff-client (offender) discussion, they can be a valuable intervention for clients with early stage stress-related problems. There are also many good self-help stress management books that help readers recognize their stress, reframe it and positively manage it. They also discuss stress reduction techniques like relaxing body parts, deep breathing exercises, meditation, etc. Another alternative is enrollment in a stress management class. Stress-related issues are emerging.

Significant Items. The following self-report responses represent areas that may help in understanding the respondent's situation and status.

**Alcohol**
6. Drinking caused serious problems.
11. Feels guilty about drinking.
46. Admits has drinking problem.
56. Been treated for drinking.
*Additional Items: #72, 9, 20, 28, 41, 62 and 84.

**Drug**
8. Guilt about using drugs.
53. Has lied about drug use.
*Additional Items: #57, 59, 67, 76, 79, 17, 37, 48, 70 and 89.

**Substance Use Disorder**
9. Often drinks more than intended.
26. Fail to fulfill important duties.
44. Gave up important activities.
71. Continue using despite knowing causes problems.
*Additional Items: #80, 83 and 88.

**Driver Risk**
14. Use cell phone while driving.
47. Admits to 2 or more scale items.
* Only two significant items were selected.

ADULT SUBSTANCE USE AND DRIVING SURVEY

REVISED FOR ILLINOIS

ASUDS - RI

Survey Booklet

Authors:

Kenneth W. Wanberg and David S. Timken

CARE

CENTER FOR ADDICTIONS RESEARCH AND EVALUATION

P.O. Box 1975
Arvada, Colorado 80001-1975
Adult Substance Use and Driving Survey (Revised for Illinois) - ASUDS-RI

Instructions

Answer each question in this booklet as to how you see yourself. Choose the answer that best fits you. Give careful thought to your answers. It is important that you answer each question as accurately as you can.

Please give an answer to every question.

Mark only one answer for each question.

Please read the instructions that are provided for the different parts of this survey. In some parts, you are asked to give answers as to how they apply to your lifetime and then as to how they apply during the last 12 months that you have been in the community.

Carefully read each question and each possible answer before making your choice.

You are asked to mark your answers on this survey booklet.

If you have any questions, ask the person who is giving you this survey.

Your answers will be treated as confidential according to the laws of your state and the Federal confidentiality laws and within the guidelines of the consent you have provided to your agency for the release of confidential information about you. Before you start to answer the questions, please complete the following information...

1. Did you drink* (alcohol) to have fun or to be happy?
   a. No.
   b. Sometimes.
   c. Often.
   d. Very often.

2. Did you drink to relax socially?
   a. No.
   b. Sometimes.
   c. Often.
   d. Very often.

3. Did you take a drink or two to relieve yourself of worries?
   a. Never.
   b. Sometimes.
   c. Often.
   d. Very often.

4. Have you had a bad headache because of having too much to drink?
   a. No.
   b. One or two times.
   c. Three or four times.
   d. Five or more times.

5. How many times have you been drunk?
   a. Never.
   b. Once or twice.
   c. Several times.
   d. Many times.

6. Have you ever been "half with it" at work or called in sick because you had too much to drink?
   a. No.
   b. One time.
   c. Two or three times.
   d. Four or more times.

7. Have you ever been unable to think or concentrate clearly after drinking?
   a. No.
   b. One time.
   c. Two or three times.
   d. Four or more times.

8. Did you drink when feeling down and depressed?
   a. Never.
   b. Sometimes.
   c. Often.
   d. Very often.

9. Did you ever drive an automobile knowing you had too much to drink?
   a. No.
   b. One time.
   c. A few times.
   d. Many times.

10. Have you ever passed out as a result of drinking?
    a. No.
    b. One time.
    c. A couple of times.
    d. Several times.

11. Have you ever felt down in the dumps after drinking?
    a. No.
    b. One time.
    c. Often.
    d. Very often.

12. Have you ever been unable to recall what you did when you were drinking?
    a. No.
    b. One time.
    c. Two or three times.
    d. Three or more times.

13. Did you drink to relieve stress?
    a. No.
    b. Sometimes.
    c. Often.
    d. Very often.

14. I exceed the speed limit if road conditions are safe.
    a. Never.
    b. Seldom.
    c. Often.
    d. Very often.

15. I have found myself driving fast without realizing it.
    a. Never.
    b. Seldom.
    c. Often.
    d. Very often.

16. When other drivers do stupid things, I lose my temper.
    a. Never.
    b. Seldom.
    c. Often.
    d. Very often.

17. I drive fast and take my chances of getting caught.
    a. Never.
    b. Sometimes.
    c. Often.
    d. Very often.

18. High speed driving gives me a sense of power.
    a. Never.
    b. Very seldom.
    c. Sometimes.
    d. Often.

19. I have taken a risk when driving just because I felt like it.
    a. Never.
    b. Very seldom.
    c. Sometimes.
    d. Often.

20. I swear out loud or curse under my breath at other drivers.
    a. Never.
    b. Seldom.
    c. Often.
    d. Very often.

21. I have outrun other drivers.
    a. Never.
    b. Very seldom.
    c. Sometimes.
    d. Often.

22. I pass other drivers when not in a hurry.
    a. Never.
    b. Seldom.
    c. Often.
    d. Very often.

23. I am a driver who likes to stay ahead of or out in front of traffic.
    a. Never.
    b. Sometimes.
    c. Often.
    d. Very often.

24. I have tried to beat a red light.
    a. Never.
    b. Sometimes.
    c. Often.
    d. Very often.

25. I dodge and weave through traffic.
    a. Never.
    b. Seldom.
    c. Often.
    d. Very often.

---

* Drink (or drinking) refers to the use of alcoholic beverages.
For the list of drugs below, circle the letter for the answer that best fits you. For alcohol, it is the number of times in your lifetime you have been intoxicated. For all other drugs, it is the number of times in your lifetime that you have used the drug. On the right side of the page opposite the drug, indicate the number of times in the last 12 months in the community, that you have been intoxicated on alcohol or you have used the other drugs. Circle "a" if you did not use alcohol or the other drugs in the past 12 months. Circle "b" if you were intoxicated on alcohol or used the other drugs from one to 10 times, etc. Then for each drug that you have used in your lifetime, put your age you last used that drug.

Please circle the letter for the answer for each question that best fits you.

74. Have you ever gotten angry at someone?
75. Have you lied about something or not told the truth?
76. Do you ever find yourself unhappy?
77. Have you felt frustrated about a job?
78. Do you hold things in and not tell others what you think or feel?
79. Have you been unkind or rude to someone?
80. Have you ever cried about someone or something?

Please circle the letter for the answer for each question that best fits you.

81. When I was in my teen years, I got into trouble with the law.
82. I was suspended or expelled from school when I was a child or teenager.
83. I have been in fights or brawls.
84. I have been charged with driving while impaired or under the influence of alcohol or other drugs.

85. I have had trouble because I don't follow the rules.
86. I don't like police officers.
87. There are too many laws in society.
88. It is all right to break the law if it doesn't hurt anyone.

Please answer these questions as to how they apply to you during your lifetime and during the last 12 months in the community. Circle the letter for the answer of your choice.

89. Number of times I have received a ticket for a driving violation (speeding, driving without a license, running a red light, etc.).

90. When in the community, I have spent time with people who have been in trouble with the law.
91. My friends and/or family get into trouble with the law.
92. When I have broken the law, I have been high or under the influence of alcohol or other drugs.
93. When I have committed a crime, I knew that I was involved in criminal behavior.
Please answer these questions as to how they apply to you during your lifetime and during the last 12 months in the community. Circle the letter for the answer of your choice.

94. As an adult, I have been in trouble with the law other than while driving a motor vehicle.

95. Number of times that I have been arrested and charged with a crime.

96. Number of times that I have been convicted of a crime (misdemeanor or felony).

97. Number of times my probation or parole has been revoked (circle "a" if never been on parole or probation).

98. Number of times I have been arrested for a crime committed against a person (such as robbery, burglary, assault, rape, manslaughter, murder).

99. Number of times I have been arrested for a domestic violence related offense.

Please answer these questions as to how they apply to you during your lifetime and during the last 12 months. Circle the letter for the answer of your choice.

100. Total amount of time I have spent on probation.

101. Total amount of time I have spent on parole.

102. Total amount of time I have spent in jail or prison.

103. I have been violent in my behavior or actions.

Please answer these questions as to how they apply to you during your lifetime and during the last 12 months in the community. Circle the letter for the answer of your choice.

104. Number of times I have been sentenced for a crime to county jail.

105. Number of times I have been sentenced for a crime for which I have been on probation or conditional discharge or conditional supervision.

106. Number of times I have been sentenced for a crime to state or federal prison.

Please answer the following questions as to how you see yourself at this time.

107. Have you felt a need to make changes in your use of alcohol or other drugs?

108. Do you want to stop using alcohol; or to continue not using alcohol?

109. Do you want to stop using other drugs; or continue not using other drugs?

110. Have you felt a need to have help with problems having to do with alcohol use?

111. Have you felt a need to have help with problems with the use of other drugs?

112. Is it important for you to make changes around the use of alcohol or other drugs?

113. Would you be willing to come to (or continue in) a program where people get help for alcohol or other drug use problems?

CRITICAL ITEMS

- Drove a few times when had too much to drink
- Passed out often when drinking
- Not recall what did when drinking twice
- Blackouts 1-3 times
- Physically violent 4-6 times
- Passed out 1-3 times
- Committed a crime 4-5 times
- Charged with impaired driving 1-2 times
- Arrested and charged with crime 1-2 times
- Convicted of a crime 1-2 times
- Violent behavior sometimes
- Have problems sleeping a lot of the time
- For sure, want to make changes in use of alcohol or other drugs
- Most likely want to stop using or continue not to use alcohol

SUGGESTED SERVICE LEVEL BENEFITS OR GUIDELINES

<table>
<thead>
<tr>
<th>Level</th>
<th>Suggested Service Level Benefit</th>
<th>Weighted</th>
</tr>
</thead>
<tbody>
<tr>
<td>4</td>
<td>Client could benefit from a basic alcohol-drug / DUI risk education program plus an extended-enhanced alcohol/drug treatment program followed with an aftercare plan.</td>
<td>13</td>
</tr>
</tbody>
</table>
ASSESSMENT SUMMARY

- Fairly open around driving risk behavior; may benefit from driving risk education
- High level of past alcohol involvement with very strong indication of a past disruptive pattern of alcohol problems.
- Low-moderate defensiveness quite open to self-disclosure.
- Moderate to high levels of mood and psychological distress. Consider mental health assessment if collateral information supports this.
- Moderate to high past AOD involvement based on drugs (drugs include alcohol) listed in the survey.
- Reports very significant AOD involvement in last 12 months.
- Past AOD negative outcomes or consequences to indicate past moderate disruptive effects and problems with possible Substance Abuse Disorder.
- Indicates low to moderate history of social-legal non-conforming.
- Indicates moderate to high motivation and desire for change and reluctant to get help for AOD problems.
- Overall history of psychosocial and AOD problems and disruption is very high.

* AOD = alcohol or other drugs

Information in the ASUDS-RI summary is based on the client's self-report. It is dependent on his or her ability to validly respond to the questions. It represents the individual's perception of self regarding alcohol and other drug use, driving attitudes and behaviors, concerns about self, relationship with the community, legal history, and willingness to be involved in the change process. This information should be used only in conjunction with information from all other sources when making referral, education or treatment recommendations. No one piece of information from this or any other source should be used solely to make such decisions. When possible, it is helpful to engage the client in a partnership when making referral and treatment recommendations and decisions. The final referral and treatment recommendations are always made by the evaluator.
