

5 WAYS YOU CAN USE...

TurningPoint ResponseWare

1 Create questions and use them at both the beginning and end of the lecture as a pre and post test for instant feedback on the effectiveness of the lecture!

2 Create a mock test for students and deliver it to them during the review session to gain instant feedback on areas that need to be further covered.

3 TurningPoint is a great way to track attendance or deliver quizzes and tests. Each student can be assigned a responder and then can be tracked with the software. No more hassle tracking attendance!

4 Play “Who Wants to be a Millionaire” and actually poll the audience!

5 Use it not only in the classroom but also at departmental meetings, functions, etc. to vote, seek opinions, prompt discussion, and more!

More Ideas for Using TurningPoint...

- Having students respond with clickers breaks the social barrier of knowing or not knowing the “right” answer
- Clickers are a great way to reset students’ clock. They pay attention for about 10 minutes, so inject a clicker question every 10 minutes or so to keep them on track!
- Use TurningPoint Anywhere to float over online games such as “Are you Smarter than a Fifth Grader?”
- Capture images with a document camera and use them to create image slides
- Use to survey student opinions on the teaching methods and teaching effectiveness in the classroom
- Use the word scramble and comparative slide features as ice breakers, to prompt discussion, or to mix up your lectures!
- Clickers can be a great way to facilitate group discussions. They will practice essential skills such as decision-making and thought expression, then report back to discuss with the class via the clickers.
