

Sharing Files with Mac OS X

Open System Preferences.

Select Sharing.

Highlight File Sharing in the left pane.

Under Shared Folders, click the plus "+" to add a folder.

Browse to the folder to be shared and click Add.

By default the Owner will have Read & Write while Everyone has No Access.

Click on No Access and select the appropriate permission

Click on the Options button to set the file sharing protocols (AFP for Macs, FTP for all operating systems, and SMB for Windows users).

Click Done.

Check the box next to File Sharing to turn on this service.
