

VPN Connection to UIS from the iPad

Connecting to UIS using Cisco AnyConnect VPN on the iPad.

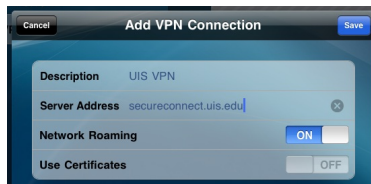

[Note: This application will **NOT** work when you are on campus.]

1. Download and install [Cisco AnyConnect](#) from the App Store
2. Locate the Cisco AnyConnect icon on your iPad and launch the app
3. Once you launch the app you will be prompted to select **OK** to enable the use of the VPN client
4. After you have enabled Cisco AnyConnect, click on the option **Add VPN Connection**

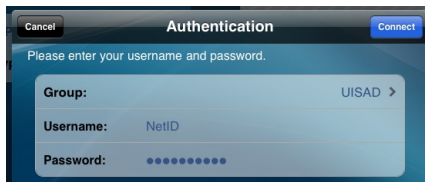

5. You are now presented with the VPN Connection box where you will add the following information

Description: UIS VPN
Server Address: <https://secureconnect.uis.edu>
Network Roaming: On
Use Certificates: Off

6. Once the information has been added, click **Save**
7. Now that you have entered in the VPN settings you are ready to connect by sliding the **On/Off** switch **On** next to **AnyConnect VPN**
8. Once you have turned the VPN on you will be prompted with the **Authentication** window. Fill in the information and click **Connect**

Group: UISAD
Username: UIS NetID
Password: UIS Password

9. You are now ready to use your iPad to access campus services such as Remote Desktop. All you have to do is click your **Home Button** and open the application to take advantage of campus services.
