Sriharsha Thakur was hospitalized recently due to a massive brain stroke, and had to undergo life saving surgery. The stroke has left her without speech or the use of her left side, including her neck, hand, and leg. She may never get back the life she was living before the stroke but the doctors are hopeful that with the right support, Sriharsha can pull through. She is from a lower income family and needs financial support for rehabilitation, home nursing, medical equipment, and uncovered medical expenses. All support will be immensely helpful.
