Increased Risk of Death When Struck by a Light Truck

More Larger Vehicles on the Road

Fewer Cars on the Road

Car Sales Drop

Passenger car sales in the U.S. dropped by 2.4 percent annually, while pickup truck sales increased by 6.4 percent annually.

Increased Risk of Death When Struck by a Light Truck

In 2008, light trucks (including pickup trucks, SUVs, vans and minivans) were 40 percent of light vehicles produced. In 2018, they were almost half.

44% of all pedestrian & pedal-cyclists fatalities involved a light truck.

Children more likely to die

Children 8 times more likely to die when struck by an SUV, and 7 times more likely when struck by a pickup truck or van/minivan, compared to a passenger car.

Increased Hospital Charges

Nearly 10% of all pedestrians or pedal-cyclists struck by a pickup truck received a non-minor head or chest injury.

In average hospital charges for the typical pedestrian or pedal-cyclist crash victim struck by a large motor vehicle.

Increased Head and Chest Injuries
