*80% score or 8 on a 10 pt. scale is the threshold for initial measures.

**CECE Threshold of being above the national mean is calculated for the total score not individual content areas. Students that do not meet the national mean after a second administration complete a remedial assignment for each content area that falls below the national mean. The percentage shown in this graph represents the percentage of students that passed the exam within two administrations or were above the national mean for the content area after two administrations. Students that do not meet threshold must demonstrate competence via remedial assignment.

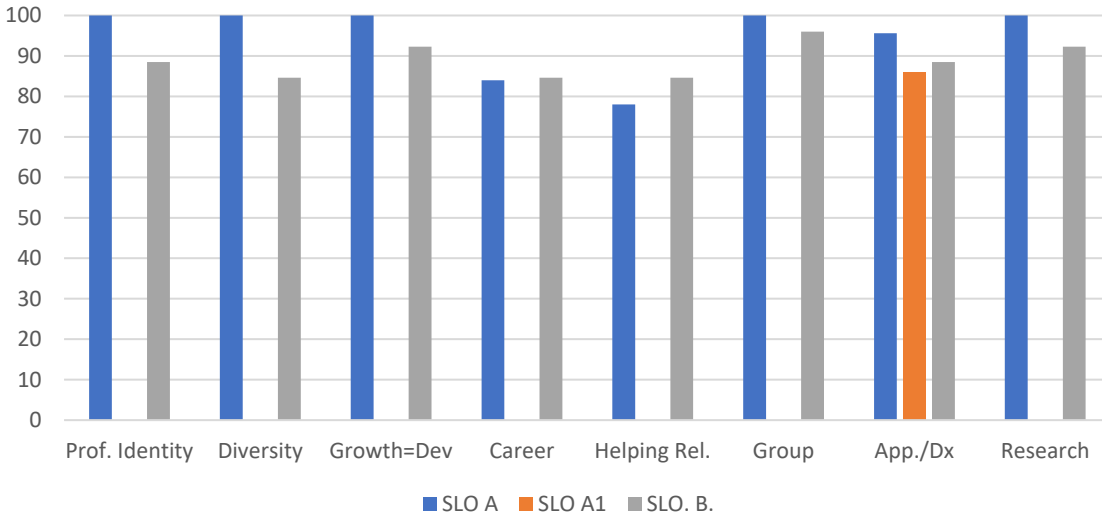

***Letter grade transitioned to a 10 pt scale with 10=A; Threshold of 6=B-
