

Where Personal Attention Meets Unparalleled Preparation

The modern world demands innovation and expertise in health, science and technology. However, many institutions either lose their personal connection in the race or don't adequately prepare individuals for real-world challenges.

This not only distances learners from practical applications but also erodes the sense of community and belonging so vital for growth.

At the College of Health, Science and Technology, we're changing the narrative. We champion a diverse, inclusive community that isn't just about education—it's about bridging the gap between foundational sciences and tangible impacts. Here, students, faculty and staff don't merely absorb knowledge—they become the pivotal force driving change, innovation and progress.

*Applying science in collaborative ways to transform lives and promote a healthy, just, and sustainable future. **Join us.***

UIS College of Health, Science and Technology

Guiding Principles

Vision

Together, we're constructing a future where UIS stands synonymous with transformative impact in health, science and technology.

Mission

The College of Health, Science and Technology fosters a community of students, faculty and staff committed to excellence in student-centered science education and training. We strive to create a **diverse** and **inclusive** scientific community that values collaboration, excellence in teaching and learning, student and faculty research, and strong linkages between foundational sciences and their application.

Strategic Anchor

In a higher education landscape where many feel like they are just a number, the College of Health, Science and Technology chooses a different path by focusing on the individual. Our dedication to **personalized attention** is what sets us apart, creating an environment where faculty, staff and students are valued as unique contributors to meaningful work. Together, we are not just advancing knowledge; we are making a deliberate and lasting impact on the world.

Academic Units

Departments of Computer Science, Mathematical Sciences, Philosophy and Psychology; School of Integrated Sciences, Sustainability and Public Health; School of Health Sciences

STRATEGIC OBJECTIVES

Find Your Path, Fulfill Your Purpose

Build a College where our faculty, staff and students wake up inspired, feel safe while they're with us, and return home fulfilled at the end of the day.

Pre-Health Professional Pathways

Develop and offer pathways for numerous health-related careers providing the courses and experiences to prepare students for the required graduate study and/or licensure.

Lab Revitalization

Update our science and technology labs to elevate experiential learning and broaden the research opportunities for our students, faculty and other stakeholders.

Strategic Partnerships

Strengthen partnerships with the community, industry and alumni, fostering the collaborative application of science for the betterment of society.

Prepare for the Future

Continue solidifying our academic foundations in health, science and technology, positioning us to discern and adapt to the evolving landscape of educational needs and opportunities.
